The Journal of Experimental Social Psychology (JESP) aims to publish articles that extend or create conceptual advances in social psychology. As the title of the journal indicates, we are focused on publishing primary reports of research in social psychology that use experimental or quasi-experimental methods, although not every study in an article needs to be experimental.

2. Meta-Analytic Strategy. The effect size estimate used here was d , which is the difference between the means for two groups divided by a pooled standard deviation and corrected for small sample bias (Hedges & Olkin, 1985). We subtracted the control group mean from the mean for the implementation intention group so that a positive d value indicates the benefit in performance conferred by ...
