I sure wish VW would start using relays for headlights ... I think I have the ground locations and such printed off on a sheet in the garage at home, ... It has a needle instead of a digital display. I did some voltage drop tests at a few locations (with engine running) and the results were somewhat ambiguous...looked good but can't be 100% sure.

My dad was an electrical engineer by trade with a lot of experience in aircraft radio design. After a series of Digifant problems he decided that the VW grounding system was not good enough so he added a #8 wire from the battery to the engine bay with stops at all the stock ground locations. Since then, no ground-related issues.
