- EPRI's Utility Requirement Document (URD) established framework for advanced light water reactors(ALWR) that provides: - A stabilized requirement basis for new technologies - A standardized set of requirements for use in design certification - A standardized set of requirements for future owner bid packages This framework can provide the basis for successful design, licensing and deployment of advanced light water reactors.

EPRI Utility Requirement Document

Owner-Operator Requirements Guide (ORG) for Advanced Reactors, Revision 0 Drawing on input from utilities, vendors, and technology developers, this report examines what utilities and other potential nuclear plant owner-operators want and need with respect to advanced reactor technologies.

Utility Requirements Document (URD) Archives - EPRI Journal

It is based on EPRI ALWR Utility Requirements Document (URD) improvements to the Standardized System 80 Nuclear Steam Supply System (NSSS) in operation at Palo Verde Units 1, 2 and 3. The NSSS is a traditional two-loop arrangement with two steam generators, two hot legs and four cold legs, each with a reactor coolant pump.
