Abstract : This book is described in the preface as the outgrowth of a course of lectures given by the senior author in the Department of Entomology of Cornell University, during the past 6 years, and more specifically, it is an illustrated revision of " Notes on the Relation of Insects to Disease " published in January 1912. It has the defects of almost all books prepared in this way in that the reader does not always find the information he requires in the place in which it might be expected.
