Pathophysiology  
In Tcm Cardiology

Integrative Anatomy and Pathophysiology in Traditional Chinese Medicine Cardiology covers the structure, function, and pathology of the cardiovascular system from the TCM and western medical perspectives. It focuses specifically on western medicine anatomy and pathophysiology, along with TCM aspects of essence, qi, blood and body fluid concepts,

we study organisms as functioning systems of molecules, cells, tissues, and organs.

This emphasis on whole-body function, and its applications to human health and disease, has made Integrative Physiology the largest undergraduate major at CU-Boulder.
