Basic Engineering is a basis of detailed design and engineering development for a construction. A cost estimate in the basic engineering phase may typically be refined to +/- 15 ~ 30%, and this is used as the project final investment decision (FID). In many cases this package may also be called as a front end engineering design (FEED) and used as an Invitation of Bidder (ITB) or tender package ...

Some basic concepts of engineering analysis Example: system of rigid carts $\sim IU + KU = 0$ Let $U = \langle p \sin W(t-T) \rangle$ Then we obtain $_{w 2} \sim \sim \sin W(t-T) +-K \langle p \sin W(t-T) = 0$ --Hence we obtain the equation There are 3 solutions $w, \sim, (I)2 ' \sim 2$ eigenpairs $w3 ' \sim 3$ In general we have n solutions 1·17
